b. Site Inspection Tours

[REDACTED] would particularly benefit by having the opportunity to visit the [REDACTED] SAM Firing Range, which tests in an operational mode a variety of surface-to-air missiles. In addition, an inspection of the [REDACTED] [REDACTED] would provide a basis for comparing imagery evaluations of related foreign ABM facilities.

An opportunity for [REDACTED] to visit the solid propellant plant at [REDACTED] to discuss details of production would be helpful to him in future analysis of foreign production plants. In addition, an inspection of the [REDACTED] [REDACTED] would provide further information about missile production techniques.

The primary concern of the [REDACTED] [REDACTED] is the imagery analysis of tactical weapons systems. It would be of advantage for [REDACTED] [REDACTED] to have the opportunity to visit this facility in order to discuss and exchange information on tactical weapons including SAM deployment and production in Eastern Europe and particularly in the Mid-East.

In order to visit the [REDACTED] installation it would be necessary for [REDACTED] to receive a USEUCOM clearance briefing [REDACTED] on the morning of 19 October 1970.
